PROFILE SUMMARY

DevOps / DevSecOps Engineer with 2.6 years of experience in designing, automating, deploying, and securing cloud-native applications across Azure and AWS. Strong expertise in CI/CD automation, container orchestration, infrastructure as code, cloud security, and observability. Experienced in delivering enterprise, financial, and AI-driven platforms with a focus on reliability, scalability, compliance, and production stability.

CORE SKILLS

CI/CD & DevOps: Jenkins, GitHub Actions, GitHub Runner, Azure DevOps, Nexus, SonarQube, Git

Cloud Platforms: Azure (AKS, Azure Container Apps, ACR, Key Vault, PostgreSQL Flexible Server, Data Factory, Event Grid, Front Door), AWS (EC2, Lambda, EventBridge, SNS, API Gateway, ELB, NLB, IAM, S3)

Containers & Orchestration: Docker, Kubernetes, Docker Swarm, Docker Compose

Infrastructure as Code: Terraform (Intermediate), Ansible (Learning)

Monitoring & Logging: ELK Stack, Filebeat, Metricbeat, Heartbeat, Prometheus, Grafana, Loki

Security & DevSecOps: Vulnerability Management, OS Patching, Configuration Hardening, Compliance Validation

Scripting & OS: Shell Scripting, Linux Administration, Python (Basic), Java (Basic)

Web & Networking: Nginx, SSL/TLS, Reverse Proxy, VPN, Private Subnet, Ingress

PROFESSIONAL EXPERIENCE

DevOps / DevSecOps Engineer

Zuci Systems India Pvt. Ltd. | Aug 2023 – Present

• Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions for multi-environment deployments across Azure and AWS.

• Implemented containerized microservices using Docker, Kubernetes, and Docker Swarm across IaaS, Kubernetes, and PaaS platforms.

• Automated infrastructure provisioning using Terraform and standardized deployment workflows to improve scalability and reliability.

• Led DevSecOps remediation activities including vulnerability management, OS patching, configuration hardening, and compliance validation.

• Implemented centralized monitoring and logging using ELK Stack, Prometheus, Grafana, Loki, and Azure Application Insights.

• Supported and stabilized production releases while ensuring security, availability, and compliance requirements.

Intern – Java & Cloud

Zuci Systems India Pvt. Ltd. | Dec 2022 – Jul 2023

• Trained on Java fundamentals, Linux administration, and cloud computing basics.

• Assisted with CI/CD tasks, application deployments, environment setup, and troubleshooting.

• Supported DevOps teams with operational and release activities.

KEY CLIENT PROJECTS

Northern Arc – Financial Services Platform (Azure)

• Jenkins multi-server CI/CD pipelines for microservice deployments.

• Docker, Docker Swarm, Kubernetes based microservices with Nginx reverse proxy.

• Azure Virtual Network configuration and secure networking.

• ELK Stack with Filebeat, Metricbeat, and Heartbeat for container health monitoring and alerts.

• Supported fintech applications including Paytm, MoneyView, and loan disbursement platforms.

• Azure VM security hardening and vulnerability remediation.

Borderless Access – Agentic AI Platform (Azure)

• End-to-end Azure DevOps implementation using AKS and Azure Container Apps.

• GPU-enabled AKS node pools for AI/ML and Agentic AI workloads.

• Azure services: ACR, Key Vault, PostgreSQL Flexible Server, Data Factory, Event Grid, AI Foundry.

• Secure networking using VPN integration, private subnets, API Gateway, Azure Front Door, and Kubernetes Ingress.

• Centralized logging using Loki sidecar containers and monitoring with Prometheus and Grafana.

• Enforced cloud security best practices including private endpoints and least-privilege access.

Mariner Finance – Enterprise Financial Application (AWS)

• EC2-based microservices using Docker and cluster-based deployments.

• CI/CD pipelines using Jenkins and GitHub Actions.

• Event-driven architecture using AWS Lambda, EventBridge, and SNS.

• API Gateway, ELB, and NLB configuration for traffic management.

• AMI creation, EBS volume management, snapshots, and backup strategies.

• OS upgrades, security patching, and DevSecOps remediation.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204) – Valid till Mar 2026

Microsoft Certified: DevOps Engineer Expert (AZ-400) – Valid till Nov 2026

HashiCorp Certified: Terraform Associate (003) – Valid till Nov 2027

EDUCATION

B.Tech – Anna University (2023) – First Class

LANGUAGES

English (Fluent)

Tamil (Native)
